Global Health Watch 4 An Alternative World Health Report

Releasing November 13, 2014

The Global Health Watch (GHW) is widely perceived as the definitive voice for an alternative discourse on health. It integrates rigorous analysis, alternative proposals and stories of struggles and change to present a compelling case for the imperative to work for a radical transformation of the way we approach actions and policies on health. It is designed to question present policies on health and to propose alternatives.

GHW4 is a collaborative effort by activists and academics from across the world, and has been coordinated the People's Health Movement, Asociación Latino-americana de Medicina Social, Health Action International, Third World Network and Medact. This edition of the GHW, published by ZED Books, will be available in November 2014.

We call upon all progressive health and development movements and NGOs to disseminate the evidence and analysis in GHW4.

We invite you to consider launching the GHW4 in your region, starting from mid-December 2014. For this purpose 'launch kits' will be available by early November 2014.
